**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period **will** apply and **will** expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply **will**, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 20 March 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 29 is rejected under 35 U.S.C. 102(e) as being anticipated by Neumann (US Patent 6,752,832). Neumann disclose an apparatus for installing an implant assembly having an axle (19), gears (21), and an engager that is separate from the gears (Fig.5) that has cog-shaped projections (9) that are designed to fit into slots (8) that rotate the implant assembly (Fig. 2) and allow for the tubular body to rotate. Neumann also has a handle section (30) at the end of the axle and also an outer casing (24). The axle extends partially through the handle.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23-24 and 27-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neumann '832 in view of Zacouto (US Patent 6,692,495). Neumann

Art Unit: 3733

discloses the claimed apparatus except for specifically a first and second gear where the first and second gear engage one another about axes that are perpendicular to each other. Zacouto discloses two gears that are perpendicular to one another (Figs. 3 and 4). This can provide an advantage of a less invasive procedure and having less of an angle to have to move through. See Col. 6, lines 1-25). It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct the device of Neumann having at least a first and second gear engaging one another at perpendicular axes in view of Zacuto to have improved access to the spine and have a less invasive procedure from less manipulation.

Claims 1-8 and 11-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Neumann '832 in view of Mauldin (US Patent 5,732,992). Neumann discloses the claimed invention except for moveable arc portions with substantially smooth surfaces. Mauldin discloses moveable arc portions (4/8) that have substantially smooth surfaces (on the inward facing sides). These moveable portions are designed for grabbing a prosthesis that is useable for insertion. It would have been obvious to one having ordinary skill in the art at the time the invention was made to construct The device of Neumann having at least moveable arc portions with smooth surfaces in view of Mauldin to have improved accessibility and control over prosthesis insertion.

### ***Finality***

The finality of the previous action dated 1/24/2008 has been withdrawn.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
